

e-POWER and e-ROC AUCTION RESULTS

80MW of Power Auctioned

Over the last few months 18 sites have been auctioned on the e-POWER auction platform. These auctions are in addition to the normal January and July auctions for summer and winter power. Usually held on the same day as the monthly e-ROC auction they are a convenient way for suppliers to buy power.

Importantly the increased frequency of e-POWER auctions gives generators greater flexibility on when to sell their power and the PPA contract length. The sites across all technologies have been competitively fought over with FIT sites typically achieving over £60.00 per MWh, 1 ROC banded sites over £100.00 per MWh and 2 ROC banded sites over £140.00 per MWh.

'I am delighted with the results. I will share this with my team and we will look at recommending your services for other sites in the future. We are installing about 50MWp of PV in the next 12 months and have an existing customer base of circa 10MWp.'

Julian Patrick CEO Freewatt Group

'I'm very pleased with the results from e-POWER, the monthly auctions are creating a real market to come to. I decided I wanted to sell now my summer 15 and winter 15/16 power and the e-POWER auction has done just that achieving better prices than the traditional bi-lateral/tender approach for PPAs.'

Andy Leach MD Renewable Power Systems

The next e-POWER auction is on Tuesday 27th January 2015

Little change in ROC prices

The scheduled e-ROC monthly auction took place on Thursday 27th November 2014 and 58,744 ROCs were sold. Approximately 57,000 ROCs were left unsold having not met their reserve price.

The average price was £42.47 up just 2p from last month.

The dates of the upcoming e-ROC auctions are:

Monday 22nd December 2014
Monday 26th January 2015
Wednesday 25th February 2015
Wednesday 25th March 2015
