

e-ROC auction results- 28th September 2010

High volume start to CP9 ROC trading

- The first e-ROC auction of CP9 was completed today 28th September 2010 with 110,000 ROCs being purchased.
- The average price achieved was £45.49 compared with that of £49.16 from the last auction for CP8 held in June. The resulting prices are in line with those forecasted by independent analysts *Cornwall Energy* who have envisaged that CP9 ROC values could be 5%-10% lower than CP8 as significant new capacity, especially from large offshore wind, comes on line.
- Of the ROCs sold in the auction around 20% were for the previous compliance period and as expected the prices achieved for these ROCs (£44.31) were lower than those for the current compliance period (£46.11), a difference of £1.80.
- The date of the next auction will be announced shortly.

For further details of our e-ROC auction, please visit our web-site, send us an email, or simply give us a call.
