

First e-ROC auction of CP9 on 28<sup>th</sup> September 2010

## ROC Prices to fall in CP9?

- NFPAS e-ROC auctions sold almost half a million ROCs in CP8 with the last auction in June selling 250,000 ROCs the largest quantity of ROCs sold since 2006 and the second largest auction since NFPAS began ROC auctions eight years ago.
- In CP9 even more ROCs are forecasted to be issued with a possible resulting effect on ROC prices. According to independent analysts *Cornwall Energy* CP9 ROC values could be 5%-10% lower than CP8 as significant new capacity comes on line, especially offshore wind. They also think 2009-10 ROC values were boosted by a colder-than-average winter that pushed up demand (and thus the level of the RO) and reduced production from wind and hydro stations.
- In these difficult market circumstances, it is more important than ever to ensure that you are selling your ROCs in the most efficient and effective way possible. You can rest assured that through the e-ROC auction you will get the best market price on the day and will be able to access the whole of the electricity market with both large and small suppliers finding the auction platform an important source for purchasing ROCS to meet their obligation.

For further details of our e-ROC auction, please visit our web-site, send us an email, or simply give us a call.
